Detailed User Guide:

Power On/Off:

Connect the included USB micro charging cable to any USB port supplying power (Laptop, Computer, AC Charger, Car Charger, etc.).

Once powered on, you will hear a beep, at the same time, the LED screen will be fully displayed for 2 seconds. Then it will enter the time display mode.

(The default display & alarm clock time is 12:00 noon, default alarm and snooze function is off.)

Clock Setting:

Under clock display mode, the colon in the middle of the display will flash.

*Long press the MODE button for 3 seconds to enter the hour setting mode. The Hour time display part will flash, short press the MODE button to change the hour.

*Short press the SET button to enter the Minutes setting mode. short press the MODE button to change the minutes;

*Short press the SET button to back the clock display mode, it will save it automatically.

Alarm Setting:

Short press the MODE button to enter alarm setting mode.

Short press the SET button to turn on/off the alarm function and snooze function.

(The first time short press the SET button to light up the "AL" icon---turn on the alarm function.

The second time short press the SET button to light up the "Z" icon---turn on the snooze function.

The third time short press the SET button to close both 'AL' & 'Z' icon---turn off alarm & snooze function

*Long press the SET button for 3 seconds to enter the alarm hour setting mode. The Hour time display part will flash, short press the MODE button to change the hour;

*Short press the SET button to enter the alarm minutes setting mode. short press the MODE button to change the minutes;

*Short press the SET button to back the alarm display mode, it will save it automatically.

(While the alarm setting, the current value will automatically return to the time display mode if there is no keystroke operation for 1 minute.)

LED Display Test Mode

Hold the MODE & SET button at same time to enter LED Display Test Mode. The LED display will be fully displayed, and the alarm will continue to ring.

This purpose of this mode is to check whether the led display is working properly.

Release the two buttons at the same time, it will return to normal operating mode.

FCC Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator & your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
