Circuit Description

This is a device to control the phone selfie function by bluetooth connection, including bluetooth chip, crystal oscillator, button and indicator light.

- 1. Button offer power for the bluetooth chip
- 2. Crystal offer oscillation source for bluetooth chip via the 12 and 13 port on the bluetooth IC
- 3. Bluetooth signal will output to antenna via the 16 port on the bluetooth chip
- 4. Indicator will work to show status via via the 3 port on the bluetooth chip
